

56" CAB-SINGLE AXLE AERIAL VS. CUMMINS ISX

OVERVIEW

This Sales Bulletin affects the single axle aerial trucks; SL-75, SA-75 & SP-70.

Effective immediately, the 56" CAB is not available with the Cummins ISX Engine. There is conflict/interference between the cab, exhaust system and outrigger assembly.

To avoid this issue:

1. Change engine to a Cummins ISL
2. Change cab configuration to 62" or 73"

If you have any questions, concerns or suggestions, please contact your Sales Application Engineer
