

SUTPHEN CORPORATION SALES TECHNICAL BULLETIN

WINDOW TINT OPTIONS

OVERVIEW

Going forward, when the option in the configurator is selected for “Window Tinting”, Sutphen Corporation will only offer the option to tint the fixed side windows, the cab crew door windows (including upper windows on 15” and 20’ raised roof cabs), and also the three (3) standard offerings for rear windows in the back wall of the cab with deep limo tint (8% light transmittance). This includes the 14.25” x 16.25” fixed windows, the 14.25” x 16.25” sliding windows, and the 5.25” x 11.25” fixed oval windows.

This option provides the windows with the tint built into the glass (NOT a film tint). Any other tint requests by the customer, including any film tint, will have to be provided by the Salesman or the customer after the truck is delivered. Sutphen Corporation will not cover the liability and warranty issues that accompany film window tinting.

This change will be effective immediately.

If you have any questions, please contact your assigned Sales Application Engineer.
