

SUTPHEN CORPORATION SALES TECHNICAL BULLETIN

A1 COMPARTMENT ROLL UP DOOR PAINT

OVERVIEW

When roll up doors are selected to be painted the A1 compartment door remains satin finish (no paint). When hose couplings are being pulled out of the hose bed they tend to damage the painted doors. Also we have noticed that with many different shades of red paint they never matches the NFPA red chevrons. If customer wants the A1 door to be painted it will have to be specified and an additional charge will apply.

If you have any questions, please contact your assigned Sales Application Engineer.
