

SUTPHEN CORPORATION SALES TECHNICAL BULLETIN

CUSTOM FIRE SSTL ACCESS LADDER

OVERVIEW

Rear access ladders are available in both cast aluminum and stainless steel. The cast aluminum ladder is a product of Zico (photo below on left) and we now offer a stainless product of Custom Fire (photo below on right). Both are available on coffin compartment bodies except the S6 is only available with the Custom Fire ladder. When building a pumper (with coffin boxes) the configurator will give you the option to select either of these products.

Any questions please contact your SAE.
