

SUTPHEN CORPORATION SALES TECHNICAL BULLETIN

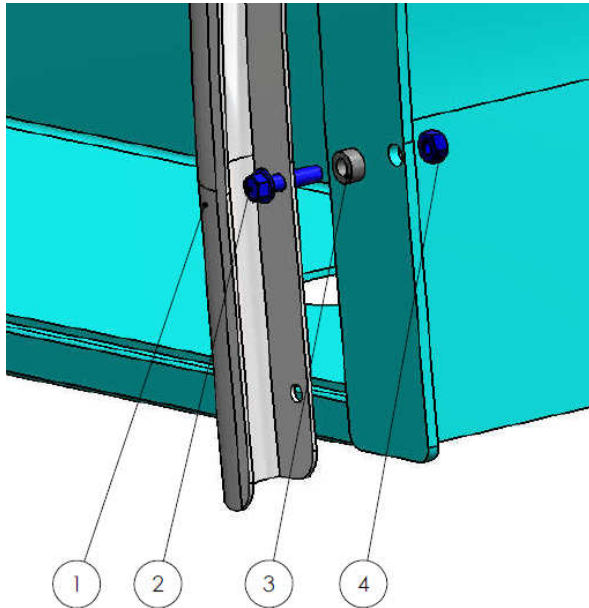

EXTERIOR MOUNTED CAB FENDER TRIM

OVERVIEW

We continue to improve areas that may cause corrosion and we have redesigned the cab fender trim to eliminate the rubber gasket. After HS-5589 all Sutphen cabs will have the new style fender trim with exception to a few trucks in production. The new fender trim design prevents water and road grime from getting trapped between fender trim and the cab fender well.

Any questions please contact your SAE.
