

## CHASSIS FRAME RAIL COATING

### OVERVIEW

The Sales Department would like to inform the dealer network that Sutphen is continuing to strengthen its frame rails and combat corrosion by bolstering its already renowned frame rails. Sutphen will now apply Cathacoat, Primer, a Top Paint Coat and a layer of Raptor Texture Coating. To the frame rail area where pump modules are positioned on the chassis. This will be the new standard process moving forward.

The Raptor Texture Coat will not only act as another layer of frame rail protection, but it will also add additional resistance which helps inhibit pump module movement.

Reference the images below for the Raptor Texture Coating application.

If you have any additional questions, please contact your STM for further details.
