

TOW FRIENDLY FRONT CLIP

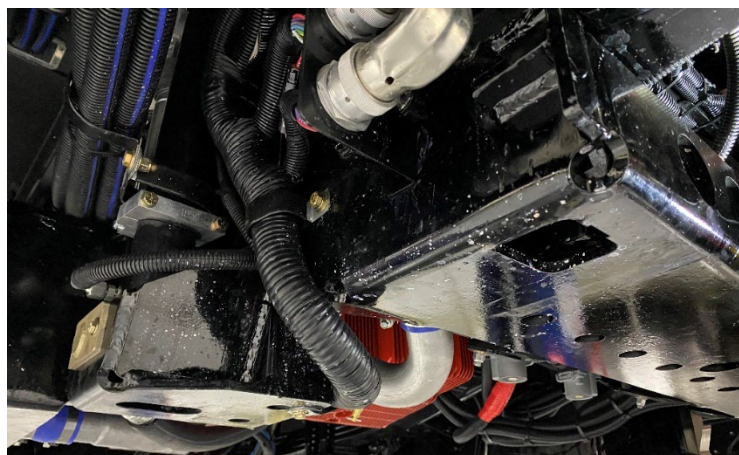

OVERVIEW

Sutphen chassis engineering has developed a new front clip that will be wrecker/tow truck friendly beyond the traditional tow eyes. A selectable option for the tow friendly front clip is now selectable. This will replace the standard front bumper clip that is called out in SQS2 as standard. The new tow friendly front clip allows for an accessible lifting point for tow trucks behind the standard tow eye location. The updated front clip is designed to be used with the U-shaped lift hardware to grab from the front (illustrated on next page).
