

CAB STEREO OPTIONS

OVERVIEW

The Sales Department would like to inform the dealer network that for the past couple of months we have been told that the JVC Jensen model radios have been on backorder. Our supplier has informed us that they have similar Kenwood models on the shelf ready to ship. Sutphen was hoping that we could hold out, and still offer the Jensen models as a selectable option, but we have now been informed that there is no ETA on when the Jensen will be back in stock for shipment. We apologize for any inconvenience this may cause. New selectable radio options will be available soon. This will also be a running production change that will be updated on the shop order for current builds in process.

OBS

30080150 HD STEREO, JENSEN, AM/FM/WB/BT

30080160 HD STEREO, JENSEN, AM/FM/WB/CD/BT

Anticipated replacements: Kenwood KME-M332BT & KMR-D328BT

The Pioneer TS-X150 surface mounts speakers are also no longer available, and all backordered items have been cancelled. We are actively working with our supplier to determine the best surface mounted speaker for our applications. Sutphen's default is the recessed speaker setup, but the overhead compartment setup determines which speaker production will use, unless otherwise specified on the shop order.

Please contact your STM, Project Manager, or Project Engineer if you have any questions.
