

Date: March 31, 2014

To: Rand Smith
Title: Director – Chassis Engineering

Company: Sutphen Corporation
Street : 1701 West County Line Road
Springfield, Ohio 45501

Application Engineer: Ron Heitman
Engine rating: 2013 ISX 15- 600 Horsepower E.V. ratings

Configuration Number: D103012BX03

Subject: IQA 13-78 Review Summary Letter

To Whom It May Concern:

Sutphen Corporation & Cummins Bridgeway LLC have worked closely together to provide the end customer with a quality installation. Interfaces, requirements and recommendations have been reviewed using the Cummins IQA process and the OEM design test process.

Cummins Bridgeway LLC and Sutphen Corporation are in agreement that Installation Quality Assurance Requirements (IQA) have been satisfied on the date this letter is issued. It remains the responsibility of the OEM to maintain this level of quality during the production cycle over time and work with Cummins on changes that affect the IQA.

This letter is limited to this vehicle configuration tested and reviewed. Any future configuration change must be evaluated by Cummins, Inc. Customer Engineering. Cummins reserves the right to review any further vehicles once the production begins. An Engineering review and/or subsequent testing will be required prior to any future changes to this installation.

The IQA review is not intended to be a substitute for prototype performance and durability testing by the vehicle builder and shall in no way constitute a warranty or other legal obligation of Cummins, Inc.
